FOR IMMEDIATE RELEASE:

ARGUS Successfully Implements TCS' ACUITY Advanced Care™

TCS Software chosen to Support Extensive Dental and Vision Network and Increase Workflow Efficiency.

Auburn, Ca – April 21, 2017 – Argus Dental & Vision, Inc., a Tampa, Florida based AAAHC accredited dental and vision insurance provider with one of the largest propriety dental networks in the United States, has successfully implemented TCS Healthcare Technologies' latest 7.30 version of ACUITY Advanced Care™ (ACUITY™). ACUITY is a member-centric care management software system that supports the needs of case, utilization, disease, and population health management programs.

The latest version of ACUITY Advanced Care continues the goal of TCS Healthcare to improve and streamline workflows across the healthcare continuum by including features such as prior-authorization workflow automation which supports turn-around-time compliance, appeals workflow support and compliance reporting, and a user-friendly My Worklist dashboard to push work to the end user. Rich Caulley, COO for Argus Dental & Vision states that “Argus is now a full week into the implementation of ACUITY. Every day, the team is getting more efficient at their jobs.”

In addition, any implementation of a new software architecture within the medical industry requires a team with the skill and patience necessary to ensure both short and long-term success. “The TCS Healthcare team has been outstanding during implementation and the months leading up to this,” Rich Caulley commented. “TCS is a valuable partner for Argus and we appreciate the sense of urgency, professionalism, flexibility and creativity the team has shown in setting up our new software to achieve our goals. We look forward to a long and mutually beneficial partnership.”

“The TCS team is very excited to have Argus Dental & Vision go live with our ACUITY Advanced suite. It has been an absolute pleasure working with the ARGUS team,” notes Deborah Keller, RN, BSN, CMCN, Chief Operating Officer for TCS. “This partnership represents our first venture into the dental and vision payer market. TCS has learned a great deal about the dental and vision market for which we are very grateful. We look forward to a long partnership with Argus.”
